

Hi, I am Melissa from NorthlineExpress and I am here today with our #1 creosote remover: [ACS Creosote Remover](#). This powerful product is going to help prevent chimney fires, corrosion in metal and masonry chimneys, and excessive creosote build-up. Anti-Creo-Soot is used prior to sweeping your chimney and let me tell you, you will be amazed at how much easier your chimney will be to clean.

Anti-Creo-Soot is more than just a Creosote Remover

Anti-Creo-Soot has been the leading creosote removal product since 1982. It is a unique professional grade, non-flammable manganese-based liquid catalyst that offers several important benefits like attacking and dispersing dangerous glazed creosote and soot.

Let me breakdown the benefits of Anti-Creo-Soot [creosote](#) remover for you...

- Helps Prevent Chimney Fires
- Helps Reduce Excess Ash and Clogging in Pellet Stoves
- Removes Unsightly Carbon from Gas Logs
- Quickly and Easily Reduces Corrosion in Metal Flues
- Improves Efficiency of Wood and Coal Furnaces and Boilers
- Significant Fuel Savings through Dispersal of Firebox Deposits
- Attacks and Disperses Dangerous Glazed Creosote and Soot
- Safe for use with catalytic combustors
- Non-toxic formula

Don't Underestimate this Product

No matter the amount that you burn Anti-Creo-Soot is right for you! The Anti-Creo-Soot Creosote Remover is great for those of you who have an existing fireplace with a chimney that may have been used for years or even for those of you who may have a recently installed chimney and you just want to make sure that your chimney is not going to build up with creosote. Creosote is inevitable and when it builds up excessively it is the number one reason for chimney fires. It can also create backdrafts into your home that makes your fireplace just have a nasty smoke smell. So just a few squirts of

Anti-Creo-Soot creosote remover each day is not only going to aid in keeping those chimney fires away but it is also going to make chimney maintenance that much easier.

Daily Use is the Best Practice

To use Anti-Creo-Soot you will simply spray the entire interior surface of the firebox and the firewood during a low fire or before lighting a fire. In fireplaces you can also spray the flue outlet and damper area as well. It is recommended to start using Anti-Creo-Soot early in the heating season in order to 'condition' wood stoves, furnaces and fireplaces. ACS can improve the safety and efficiency of a wood or coal burning appliance. Using daily will improve the heat transfer through the appliance because having 1/32" of carbon insulates like having 2" of asbestos.

So do not miss out, get your ACS Creosote [Remover](#) and maintain your chimney the easy way. To sweeten the deal if you purchase 1 gallon of the Anti-Creo-Soot Creosote Remover between now and October 31st 2015 you will receive a Free quart of ACS instantly.

A promotional banner for Anti-Creo-Soot. On the left, there is a large white jug of the product and a smaller white spray bottle. The background shows a fireplace with a fire. Text overlays include: "Valid 10/1-10/31" at the top center; "Your Price: \$44.95" in the center; "FREE" in a gold circle next to the spray bottle; and a dark blue box on the right with yellow and white text that reads "BUY A GALLON OF OUR #1 SELLING CREOSOTE REMOVER - ACS AND GET A FREE QUART!". At the bottom right is a red button with white text that says "SHOP NOW".
