

Ever had a pesky flying insect buzzing around inside and every time that you try to get them with the swatter they seem to know and go up high on your walls or ceilings where you cannot get them? I'm Melissa from NorthlineExpress, and in this video I'll tell you why you should put down your old swatter and pick up a DynaZap.

The [DynaZap Extendable Insect Zapper](#) kills hard to reach wasps, flies, mosquitoes, and other flying insects on contact. The DynaZap is different from other racket style zappers because it is fully extendable to over 3 ft. in length. It also has a telescopic head that allows it to bend in multiple directions so that it's nearly impossible for an insect to get where the zapper cannot reach.

This little zapper is also powerful enough to kill or stun biting insects on contact. This allows you to get those flying insects in air rather than having to run around waiting for them to land so you can swat them. It runs on two AA batteries that are included. It also features a safety switch. This means that the unit will only activate when the unit is on and the button is pushed. It is also very light weight, weight only 1lb so it's perfect for everyday indoor or outdoor use.

So now that I have introduced you to the DynaZap would you like to know how to get this \$15 value free? From May 20th through May 27th we are giving one free DynaZap Handheld Insect Zapper away with every [DynaTrap Mosquito Trap](#) Purchased. The free DynaZap can only be found at NorthlineExpress.com, home of the "Buy and Try" satisfaction guarantee, so make sure that you get yours while you still can. They'll be gone in a Zap!
