

Are you looking for sun protection for your outdoor space that is innovative and a great value? I'm Melissa from NorthlineExpress today I will introduce you to shade sails and how they let you create your own unique shade design even to cover large areas!

**Shade sails** easily attach to buildings, trees, or posts to provide protection from the sun and shade any place that you may need it. They are available in a variety of sized triangles and squares. This allows you to overlap them and create unique shade sources or a shade source for a large area. Shade sails are the perfect source of shade for decks, patios, or pool and play areas.

The shade sails that we offer are made with innovative fabric that allows it to have a long life, even when exposed to the sun for long periods of time. The fabric is UV stabilized meaning that it will let some light through but will block 85% of the sun's harmful UVA & UVB rays. It is also a breathable woven material, allowing for a breeze to pass through keeping you cool on those scorching hot days. The unique design of the woven materials also allows water to pass through. This is a great benefit because it prevents water from building up and causing your shade sail to sag.

Shade sails, as I mentioned earlier, are a great source of shade anywhere you may need one. Each shade sail features Reinforced D-rings for quick mounting. You can mount shade sails pretty much anywhere including buildings, trees, or posts. Even though the fabric is breathable and allows air to flow through the shade sail, you should still make sure that your attachment points are sturdy enough to withstand the pull of the sail on windy days.

Shade sails are easily cleaned with a mild soap and water using a soft sponge or cloth. They are also light weight and fold up compact so at the end of the year or when not in use you can fold them up and keep them in a shed without having to worry about taking up a lot of space like traditional **canopies**.

So if you're looking for the sun protection of a traditional canopy with a lot more versatility, consider a shade sail. You'll get the same shade in a cost effective way! I hope that you have found this information helpful. If you still have questions about shade sails give us a call at 866-667-8454. At NorthlineExpress, home of the buy and try satisfaction guarantee, we're always happy to help!
