

When getting ready for a summer full of backyard campfires you want to make sure that you have plenty of firewood in a spot that you can easily access. You also will want to make sure that you are keeping your firewood stacked neatly as well. I'm Melissa from NorthlineExpress and in this video will introduce you to a couple log racks that are great ways to keep your firewood ready to go all season long.

Even seasoned firewood will need plenty of airflow to keep it dry and ready for the fire and that is why it is so important to stack your firewood. It's also recommended to keep your firewood stacked at least 30' from your home to help keep unwanted guests, like insects & rodents who may live in the stacked wood, from getting inside. Also remember you want to keep your firewood stacked raised up off of the ground. Stacking your firewood raised rather than directly on the ground promotes airflow and prevents rotting and excess insects.

If you're looking for a quick and easy solution for stacking your firewood, consider our [HYC Log Racks](#). Made right here in the USA, these tubular steel firewood racks meet all of your firewood storage needs without spending a ton of money. These racks are an attractive design and color that blends nicely into any setting and they are built to stand the test of time. These racks are available in two sizes, [medium](#) measuring 45" long and [large](#) measuring 87" Long. The medium rack will hold up to 1/5 of a cord and the large rack will hold 2/5 of a cord of firewood.

Both sizes are built with heavy-duty steel and feature a weatherproof black powder coat finish that resists chipping and corrosion. These racks will require assembly but assembly is quick and simple.

If you purchase your HY-C Log Rack from NorthlineExpress.com from May 1st – May 14th you'll get an extra 10% in savings. Use promo code HYCRACK10 when you check out to receive your savings. It's another great promotion from NorthlineExpress, home of the buy and try satisfaction guarantee.
