

Do you need mosquito control on the go? I am Melissa from NorthlineExpress and I am here to tell you how you can forget about mosquito repellent sprays or lotions and repel mosquitoes naturally with the AllClear SideKick Mosquito Repeller.

This clip-able device allows you to naturally repel mosquitoes for up to 18 hours with its fan-based technology. The fan circulates a blend of non-toxic botanical oils like lemongrass, geranium oil, and peppermint oil that are effective at repelling mosquitoes and safe around children and pets. The SideKick has been tested and proved to be just as effective as chemical competitors and lasted about 50% longer.

This unit can be turned on and off and is refillable. You will get 1 refill with your unit and that initial refill will provide you up to 18 hours of protection. You can clip the unit right to your belt, a back pack, or anywhere that you can clip it to. You can also use the unit just setting it near you. The sidekick is perfect for camping, gardening, fishing, boating, hiking, and more because it allows hands free protection. I've even used the sidekick on my dogs harness when playing in the yard or going on walks with great success!

With the summer months upon us and the mosquitoes out in full force this little device is one that's worth keeping around. It's also a great choice for your wallet with a low price of only \$9.99. To sweeten the deal right now when you purchase a Sidekick Mosquito Repeller we are going to give you a 2 pack of refills absolutely free! There's no reason to be bothered by mosquitoes this season especially with an offer like that. You'll only find the free 2 pack of refills with an AllClear SideKick at NorthlineExpress.com, home of the Buy and Try Satisfaction Guarantee.
