

Why to use the DynaTrap 2000XL

The time has finally come to fire up the grill again and enjoy the warm days outdoors, but the mosquitoes always seem to know when you head out the door. No one enjoys swatting at flying insects, and we all hate being bitten. Some bug zappers need chemical attractants or use propane to attract bugs, not the [DynaTrap 2000XL](#) Indoor/Outdoor Insect Eliminator.

The DynaTrap 2000XL Indoor/Outdoor Insect Eliminator uses three patented technologies: Two UV fluorescent bulbs produce a warm light to attract insects to the DYNATRAP day & night, a titanium dioxide- (TiO₂) exclusive coated funnel produces CO₂, which is irresistible to mosquitoes, luring the insects to the powerful yet whisper quiet vacuum fan that sucks insects into the trap.

The insects are collected and trapped into the retaining cage away from the area of usage providing safe pest protection and comfortable living quarters. There is even a trap door that automatically closes when power goes off in order to prevent the bugs from escaping. Perfectly safe for use indoors, as it uses no chemicals and produces no odors. Its rugged all-weather construction is designed to survive life outdoors.

The DynaTrap 2000XL Indoor/Outdoor Insect Eliminator plugs into any normal household outlet. The preferred install location is away from other light sources, about 30 feet away from areas where you will be sitting, and about 5-6' above the ground. The DynaTrap 2000XL Indoor/Outdoor Insect Eliminator will effectively reduce mosquitoes, biting flies, Asian beetles, wasps, hornets, yellow jackets, moths, stink bugs, and other flying insects from your outdoor and indoor living spaces.

The DynaTrap 2000XL Indoor/Outdoor Insect Eliminator comes with 2 UV light bulbs, which will last approximately 5,000 hours, and a seven (7) foot cord, Covers up to 1 acre and only weighs 9 pounds and is 22" tall and 13" diameter. Also comes with a cleaning brush to keep it free of bugs once you empty the retaining cage.

I hope that you found this information to be helpful.
