

Hi I'm Melissa from NorthlineExpress here with effective mosquito control that you don't have to spray on! Within minutes after turning on the Lantern, the repellent creates a 15 by 15-foot mosquito & fly free zone, the size of an average deck, patio, or campsite.

This lantern is powered by a single butane cartridge. Which means it's portable and there are no electrical cords to mess with. The butane provides the cordless, portable heat that activates the device. The heat generated by the butane cartridge is directed to a metal grill that is part of the design of the Lantern. A small mat, saturated with repellent, sits on top of the metal grill. Heat vaporizes the repellent, allowing it to rise into the air.

The repellent is allethrin, a copy of a repellent that naturally occurs in chrysanthemum flowers. It repels mosquitoes, black flies, and no-see-ums, and is harmless to humans and pets.

Butane cartridges provide 12 hours of use. You will replace the mat after it turns from blue to white, after approximately 4 hours of use. You can use a mat until it turns completely white.

You can turn the unit on and off at will, without replacing the mat. Mats used for a period of time less than four hours will still be just as effective. I suggest if there is going to be a significant amount of time

between usages like several days or more, that you keep the mats in their foil packaging or in a sealed sandwich bag between uses. Your unit will include, 1 butane cartridge and 3 insect repellent mats

Now let's talk about the fun stuff! This unit is dual-function it repels bugs and provides light. It even has "low" and "high" settings; for the 8 LED lamp. The lights operate on 4 AA batteries, which you have to provide. And as any good lantern would it has a comfortable handle. I love that I can use it on evening strolls, on a camping trips, or as mood lighting on my patio ALL WHILE KEEPING MOSQUITOES AWAY!!! The Thermacell lantern is another great product from NorthlineExpress home of the buy and try satisfaction guarantee.
