

Oh hey, I'm Melissa from NorthlineExpress, and I was just getting ready to do some gardening and I can't tell you how happy that I am that I'm outside and I'm not being eaten alive by mosquito's. And it's all thanks to the Terminix All Clear Sidekick mosquito repeller.

This little device right here on my hip is capable of providing up to 18 hours of hands free, all natural mosquito control. It's also got an on-off switch so if I'm only outside for a little bit of time, I can turn it off, and reserve that mosquito protection for a later use.

It's also really simple to use, all I had to do was take it out of the package, install the included refill, and the two double A batteries that came with it as well, and then simply place it on my hip, and I was ready to go.

I personally love to use it when I'm gardening, and riding my horses, but it's also great to keep in your car, so if you go camping, go to the beach, while you're out walking your pets, pretty much anywhere you can be outside you can use this to have a 15 foot area of mosquito free heaven.

It's another great product from NorthlineExpress, helping bring you safe and all natural mosquito control, and also don't forget we're home of the buy and try's satisfaction guarantee.
