

Hi I'm Melissa from NorthlineExpress, it's Christmas in July at NorthlineExpress. That's because I am here to tell you about an exclusive promotion for DynaTrap going on at NorthlineExpress. Now through July 21<sup>st</sup>, with the purchase of a DynaTrap, we're going to throw in a set of replacement bulbs absolutely FREE! That's really valuable to you because DynaTraps are more effective with the warmth that the UV bulbs put off, so if your bulbs were to go out you've got an extra set on hand. No waiting and losing the effectiveness of your trap while you wait for your new bulbs to arrive.

DynaTraps are a simple effective solution to insect pests in your outdoor living space. They work without any type of bait or lure, which means they are more cost effective because you do not have to purchase extra accessories like bait or lure to attract the mosquitoes. In-fact they create their own bait, carbom dioxide, without the use of propane which is another accessory that you do not have to buy with DynaTraps.

The way they work is quite simple. There are UV lights in the top of the units which create warmth and give off light to attract the flying insects. Inside the unit there is a tunnel, surrounding the fan that, is coated in Titanium Dioxide. When the unit is operating the Titanium Dioxide coated tunnel produces

carbon dioxide, which is irresistible to mosquitoes and other biting insects. Then the vacuum fan suck insects into the retaining cage where they are trap and left to dehydrate and die.

DynaTrap mosquito Traps are simple solution to flying insect pest in your outdoor living space. What are you waiting for, this promotion end on July 21<sup>st</sup> and is just one of the reasons you should bring home a DynaTrap today from NorthlineExpress.
